100 PERCENT INDIGENOUS-OWNED AND CONTROLLED | SUPPLY NATION CERTIFIED | AUSTRALIAN OWNED AND OPERATED

FORCES GROUP AUSTRALIA

Forces Group Australia is a 100 percent Indigenous-owned Australian organisation operating as a Prime Integrator for deployable infrastructure and operational capability programs.

Forces Group holds the head contract and full delivery accountability.

Specialist delivery partners execute defined capability components under Forces Group governance, integration standards, and assurance frameworks.

This model allows Defence, government, and emergency services to engage a single accountable Indigenous Prime while integrating multiple specialist capabilities under controlled delivery.

This structure simplifies procurement, strengthens delivery assurance, and supports Indigenous Procurement Policy participation.

PROCUREMENT ALIGNMENT AND ASSURANCE

Forces Group Australia is structured to operate within Commonwealth and Defence procurement frameworks.

Forces Group supports Indigenous Procurement Policy compliance through Prime-led contract structures that embed Indigenous participation within delivery governance.

Our delivery model supports multiple procurement pathways while maintaining clear accountability and value-for-money principles.

Forces Group may be engaged through:

- Indigenous Mandatory Set Aside procurement
- Indigenous participation requirements on high-value contracts
- Direct procurement from Indigenous small to medium enterprises where permitted under policy
- Formal panel and non-panel procurement environments

Procurement officers retain full discretion in value-for-money assessment and sourcing decisions.

Forces Group provides a compliant and auditable Prime-led delivery structure to support informed procurement outcomes.

CLIENTS AND OPERATIONAL ENVIRONMENTS

Forces Group delivers deployable infrastructure capability into operational environments where reliability, speed, and accountability are critical.

We support:

Defence and national security

Government and public sector

Emergency services and disaster response

Critical infrastructure and utilities

Remote and regional operations

WHY FORCES GROUP AUSTRALIA EXISTS

Defence and government programs increasingly rely on deployable infrastructure capable of operating in demanding environments.

Delivery is often fragmented across multiple suppliers, creating unclear accountability and integration risk.

Where no single entity holds end to end responsibility, procurement teams inherit governance complexity, reporting burden, and delivery risk.

Forces Group Australia exists to solve this problem.

We operate as an Indigenous owned Prime Integrator, bringing defined capability domains together under governed contracts, controlled scope boundaries, and accountable delivery.

Forces Group integrates four operational capability domains:

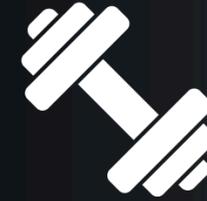

- Operational Workforce Systems
- Deployable Energy and Power Systems
- Deployable Infrastructure Systems
- Integrated Systems Delivery

This model provides procurement clarity, controlled delivery, and Indigenous participation embedded within contract governance.

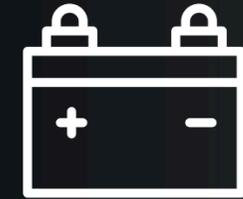

OPERATIONAL CAPABILITY DOMAINS

Forces Group integrates deployable infrastructure systems across four operational capability domains.

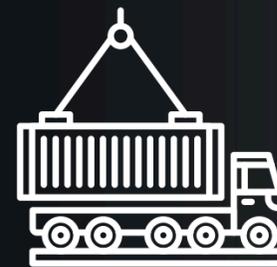

Each domain is designed for transportability, durability, and integration into Defence and government operational environments.

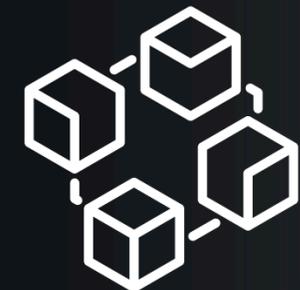

OPERATIONAL
WORKFORCE
SYSTEMS

DEPLOYABLE
INFRASTRUCTURE
SYSTEMS

INTEGRATED
SYSTEMS
DELIVERY

OPERATIONAL CAPABILITY DOMAINS

OPERATIONAL WORKFORCE SYSTEMS

Infrastructure systems supporting workforce readiness, heat stress management, recovery capability, and personnel sustainment.

Scope includes:

- Deployable training and conditioning infrastructure
- Heat stress mitigation systems
- Recovery and rehabilitation modules
- Workforce sustainment infrastructure

Outcome:

Improved personnel readiness, reduced injury exposure, and sustained operational performance.

DEPLOYABLE ENERGY AND POWER SYSTEMS

Hybrid and off grid energy infrastructure supporting remote operations, disaster response, and temporary facilities.

Scope includes:

- Solar and battery integrated container systems
- Hybrid generator and renewable energy modules
- Trailer mounted energy platforms
- Energy resilience and redundancy systems

Outcome:

Reduced fuel logistics burden, increased operational autonomy, and improved energy security.

OPERATIONAL CAPABILITY DOMAINS

DEPLOYABLE INFRASTRUCTURE SYSTEMS

Containerised and modular infrastructure configured for rapid deployment across Defence, emergency response, and government programs.

Scope includes:

- Accommodation and workforce modules
- Command and coordination facilities
- Storage and logistics infrastructure
- Specialist containerised operational systems

Outcome:

Rapid establishment of operational infrastructure with defined scope and controlled integration risk

INTEGRATED PRIME-LED SYSTEMS DELIVERY

Forces Group Australia integrates approved partner capabilities under Prime held contracts, governed scope, and controlled delivery frameworks.

Scope includes:

- Multi domain systems integration
- Defined scope and acceptance frameworks
- Partner execution under Prime governance
- Procurement ready documentation and reporting

Outcome:

Single accountable Indigenous Prime.
Reduced governance burden.
Controlled multi capability delivery.

PRIME-LED DELIVERY MODEL

Forces Group acts as the accountable Prime Integrator for multi-capability infrastructure delivery.

Clients engage with one prime entity.

Forces Group holds accountability from contract to deployment.

We manage:

- Risk allocation to point of execution
 - Capability definition
 - Design coordination
 - Delivery oversight
 - Quality and governance
 - Ongoing support

SOVEREIGN, ACCOUNTABLE, TRUSTED

Forces Group operates with governance, accountability, and long term sovereign capability in mind.

Built for environments where trust and delivery certainty matter.

1

Australian-based operations

2

100 percent Indigenous-owned and controlled

3

Prime contractual accountability

4

Government-ready compliance frameworks

5

Proven engagement across Defence and public sector environments

6

Integration of sovereign Australian delivery partners.

GLOBAL DELIVERY PATHWAYS

Forces Group is structured for international engagement and export ready delivery.

Australia remains our primary delivery focus.

International engagement occurs through government supported Indigenous business programs and allied collaboration pathways, without affecting delivery priority for Australian Defence and government clients.

We actively engage with:

- DFAT and Austrade initiatives
- International trade and sovereign capability programs
- Global partners seeking deployable infrastructure solutions
- Austrade and DFAT supported international trade engagement programs

DEPLOYABLE INFRASTRUCTURE FOR OPERATIONAL CAPABILITY

FORCES GROUP AUSTRALIA DELIVERS SOVEREIGN DEPLOYABLE
SYSTEMS FOR DEFENCE, GOVERNMENT, AND ALLIED OPERATING
ENVIRONMENTS.
