# FORCES GROUP AUSTRALIA

---

Forces Group Australia is an Indigenous-owned Australian organisation structured to act as a Prime Integrator for deployable capability programs across Defence, government, and emergency services.

Forces Group holds the head contract and contractual accountability for delivery.

Capability is delivered through approved partners operating under Forces Group governance, integration standards, and assurance processes.

**Forces Group does not manufacture products.**

**Forces Group does not act as a reseller.**

Forces Group's role is to integrate, govern, and deliver capability under a single accountable Indigenous Prime.

This structure reduces procurement risk, simplifies delivery accountability, and enables Defence to meet Indigenous procurement policy obligations without compromising capability or assurance.

# PROCUREMENT ALIGNMENT AND ASSURANCE

**Forces Group Australia is structured to operate within Commonwealth and Defence procurement frameworks.**

Our delivery model supports multiple procurement pathways while maintaining clear accountability and value-for-money principles.

## Forces Group may be engaged through:

- Indigenous Mandatory Set Aside procurement
- Indigenous participation requirements on high-value contracts
- Direct procurement from Indigenous small to medium enterprises where permitted under policy
- Formal panel and non-panel procurement environments

Procurement officers retain full discretion in value-for-money assessment and sourcing decisions.

Forces Group provides a compliant and auditable Prime-led delivery structure to support informed procurement outcomes.

# CLIENTS AND OPERATING ENVIRONMENTS

Forces Group delivers capability into environments where reliability, speed, and accountability matter.

## We support:

Defence and national security

Federal, state, and local government agencies

Emergency services and disaster response

Remote, regional, and off-grid operations

Australian-based programs with domestic and allied operating environments

# WHY FORCES GROUP AUSTRALIA EXISTS

Defence and government programs increasingly require deployable capability that performs in real operating environments.

Too often, delivery becomes fragmented across multiple suppliers, unclear accountability, and uncontrolled integration risk.

Where no single entity holds end-to-end responsibility, procurement teams inherit governance complexity, reporting burden, and escalation exposure.

Forces Group Australia exists to remove that fragmentation.

We operate as an Indigenous-owned Prime, structured to integrate defined capability domains under governed contracts, controlled scope boundaries, and accountable delivery.

Our model supports operational readiness across four core areas:

- Human Performance
- Energy and Power
- Modular Infrastructure
- Integrated Prime-led Systems Delivery

**This structure provides procurement clarity, controlled execution, and Indigenous participation embedded at the governance level.**

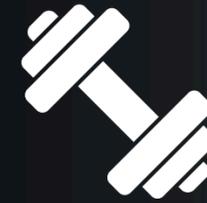

# DEPLOYABLE CAPABILITY DOMAINS

---

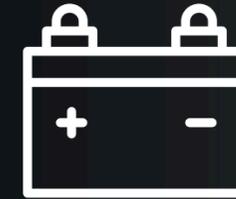

Forces Group delivers modular, deployable systems across four core domains.

All systems are designed for transportability, durability, and integration into Defence and government operating environments.

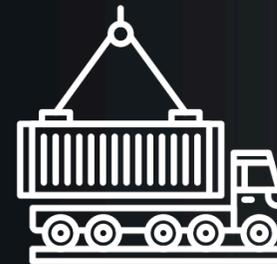

Each domain is modular, interoperable, and designed to integrate into broader Defence and government operating systems.

DEPLOYABLE  
HUMAN  
PERFORMANCE

DEPLOYABLE  
ENERGY AND  
POWER

DEPLOYABLE  
MODULAR  
INFRASTRUCTURE

INTEGRATED PRIME-  
LED SYSTEMS  
DELIVERY

# CAPABILITY DOMAIN DETAIL

---

## DEPLOYABLE HUMAN PERFORMANCE SYSTEMS

Integrated fitness, recovery, heat stress, and responder support systems structured to sustain operational capability in remote, high-risk, and demanding environments.

### Scope includes:

- Deployable training and conditioning infrastructure
- Heat stress mitigation systems
- Recovery and rehabilitation modules
- Workforce sustainment support capability

### Outcome:

Improved personnel readiness, reduced injury exposure, and sustained operational performance.

## DEPLOYABLE ENERGY AND POWER SYSTEMS

Hybrid and off-grid power systems structured to support remote operations, disaster response, and temporary infrastructure without reliance on fixed utilities.

### Scope includes:

- Solar and battery-integrated container systems
- Hybrid generator and renewable power modules
- Trailer-mounted energy platforms
- Energy resilience and redundancy systems

### Outcome:

Reduced fuel logistics burden, increased operational autonomy, and controlled energy security.

# CAPABILITY DOMAIN DETAIL

---

## DEPLOYABLE INFRASTRUCTURE SYSTEMS

Containerised and modular systems configured for rapid deployment across Defence, emergency response, and government programs.

### Scope includes:

- Accommodation and workforce modules
- Command and coordination facilities
- Storage and logistics infrastructure
- Specialist containerised operational systems

### Outcome:

Rapid establishment of governed operational capability with defined scope and controlled integration risk.

## INTEGRATED PRIME-LED SYSTEMS DELIVERY

Forces Group Australia assembles approved partner capabilities under structured Prime-held contracts, defined scope boundaries, and controlled integration governance.

### Scope includes:

- Multi-domain systems integration
- Defined scope and acceptance frameworks
- Partner-governed execution under Prime contract
- Procurement-ready documentation and reporting

### Outcome:

Single accountable Indigenous Prime.  
Reduced governance burden.  
Controlled multi-capability delivery.

# PRIME-LED DELIVERY MODEL

Forces Group acts as the single accountable delivery partner.

---

Clients engage with one prime entity.

Forces Group holds accountability from contract to deployment.

---

## We manage:

- Risk allocation to point of execution
  - Capability definition
  - Design coordination
  - Delivery oversight
  - Quality and governance
  - Ongoing support

# SOVEREIGN, ACCOUNTABLE, TRUSTED

---

Forces Group operates with governance, accountability, and long-term sovereign capability in mind.

We are built for environments where trust and delivery certainty matter.

1

Australian-based operations

2

100 percent Indigenous-owned and controlled

3

Prime contractual accountability

4

Government-ready compliance approach

5

Proven engagement across Defence and public sector environments

# GLOBAL DELIVERY PATHWAYS

Forces Group is structured for international engagement and export-ready delivery.

**Australia is Forces Group's primary delivery focus.**

International engagement occurs through government-supported Indigenous business programs and allied collaboration pathways, where appropriate, and does not affect delivery prioritisation for Australian Defence or government clients.

## We actively engage with:

- DFAT and Austrade initiatives
- International trade and sovereign capability programs
- Global partners seeking deployable solutions
- Including current engagement across Middle East and North American trade initiatives

# DEPLOYABLE CAPABILITY. DELIVERED WHERE IT MATTERS.

FORCES GROUP AUSTRALIA DELIVERS SOVEREIGN CAPABILITY  
SOLUTIONS FOR DEFENCE, GOVERNMENT, AND ALLIED OPERATING  
ENVIRONMENTS
